☑ Send me occasional product updates, announcements, and offers.

Verify your account

Please solve this puzzle so we know you are a real person

Verify

1.Enter your username

2.Enter your email id

3.Enter your password

4.click to verify your account

STEP 3 : After clicking on the create account you will receive a mail on your email account which you have entered while the creating account for verification. Now you have to just click on the mail and then enter the username and password after completing this your account will be verified.

Almost done, **@priya553**! To complete your GitHub sign up, we just need to verify your email address: **py721759@gmail.com**.

Verify email address

Once verified, you can start using all of GitHub's features to explore, build, and share projects.

Button not working? Paste the following link into your browser: https://github.com/users/priya553/emails/150509486/confirm_verification/736a698127afbab5fba99a41bf9129bd74e4cb09

You're receiving this email because you recently created a new GitHub account or added a new email address. If this wasn't you, please ignore this email.

GitHub

Sent with <3 by **GitHub**.
GitHub, Inc. 88 Colin P Kelly Jr Street
San Francisco, CA 94107

STEP 4 : After verification you will see github welcome page with some options you can select according to your preference or you can just click on complete setup. Now you have successfully created account in Github!!

Welcome to GitHub

Woohoo! You've joined millions of developers who are doing their best work on GitHub. Tell us what you're interested in. We'll help you get there.

What kind of work do you do, mainly?

|	
Software Engineer I write code	**Student** I go to school
Product Manager I write specs	**UX & Design** I draw interfaces
Data & Analytics I write queries	**Marketing & Sales** I look at charts
Teacher I educate people	**Other** I do my own thing

How much programming experience do you have?

2) CREATING A REPOSITORY.

STEP 1: To create a repository click on create

repository option on the github page.

CLICK HERE TO CREATE A NEW REPOSITORY IN GITHUB.

STEP 2 : Enter repository name and description. Also you will have to option PUBLIC (by selecting this option your repository will be visible to everyone) and PRIVATE (by selecting this option your repository will not be visible to others). And you can also add a readme file, gitignore and license. after selecting Option according to your choice click on Create Repository Option.

repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

✔ **Add a README file**

This is where you can write a long description for your project. Learn more.

☐ **Add .gitignore**

Choose which files not to track from a list of templates. Learn more.

☐ **Choose a license**

A license tells others what they can and can't do with yo code. Learn more.

This will set ⌥ main as the default branch. Change the default name in your settings.

Create repository

CLICK THIS TO CREATE REPOSITORY

3) Cloning a Repository

STEP 1: Click on the CODE option
